

Oil Change - 2018 Alfa Romeo Stelvio 2.0T

VIN ZASFAKPN5J7B88115 | about 142,290 km / 88,415 mi | cuore, 2026-09-26

Oil and filter

Item	Spec	Conf.
Viscosity	0W-30 full synthetic	CORROB.
Spec / approval	FCA/Mopar MS-13340, API SN (2017-2018 build); historically also cited as Fiat 9.55535-GS1	CORROB.
Capacity (with filter)	5.5 qt / 5.2 L	SINGLE
Filter	Mopar 4892339 (suffix revised over production -- BE / AB / AC seen; reported as 'same filter, revised part number')	SINGLE
Do NOT use	Mopar 68191349AA / AC -- that is the 2.9L V6 (Quadrifoglio) filter, not this 2.0T	CONFIRM.
Drain plug torque	20 Nm	SINGLE
Filter housing cap torque	25 Nm	SINGLE

Reported for the 2.0T MultiAir drain plug, described by this source as having a built-in rubber gasket. Low torque for a drain plug -- easy to overtighten past this into the pan threads; use a torque wrench, not feel.

Interval

Interval	Value	Conf.
Shop interval (conservative)	8,000 mi / 12 mo	CORROB.
FCA maximum	10,000 mi / 16,000 km / 12 yr	CONFIRM.
FCA severe duty maximum	4,000 mi / 6,500 km	CONFIRM.

- Reset methods** (dash reminder + day/mile counter; SINGLE):
- MES (MultiEcuScan) -- reported as the fastest/most reliable method, clears both the cluster reminder and day/mile counter in seconds.
 - wiTECH (dealer tool) -- IPC module, Misc Functions, Maintenance Reset, follow prompts.
 - Accelerator-pedal method (no tool) -- ignition on/engine off, fully depress and release the accelerator pedal slowly 3 times (some cluster software revisions reportedly need 4-6 pumps), 1 second apart, then start the engine. Unofficial and reported inconsistent across software revisions.

MES log: Oil-change reset logged for this VIN -- Oil change COMPLETED at 2026-09-15 20:50:00; Oil change COMPLETED at 2026-09-15 20:49:00. No odometer was recorded with this event; it corroborates that a reset was run, not a full service record. Record the actual oil change (brand, amount, filter, torques, odometer) in cuore.

UNKNOWN values above must come from the service manual (TechAuthority) -- never substitute a guessed number. All figures here are graded CONFIRMED (manufacturer document), CORROBORATED (two independent sources) or SINGLE (one source, not cross-checked).

Service record

Date		Odometer (km / mi)	
Oil brand / product		Amount added	
Filter brand		Filter part no.	
Drain plug torque applied		Initials	
Filter cap torque applied		Initials	
Drain plug washer replaced?		Sample taken?
