Mechanic Notes - 2018 Alfa Romeo Stelvio 2.0T

VIN ZASFAKPN5J7B88115 | cuore, 2026-09-26

What notes are for

The corpus (MES/wiTECH logs) and the dealer store answer **what happened**. Notes answer **what the technician knows about it that nothing else captured** -- e.g. "purge valve replaced by me 2026-09-10", "this scan was taken right after a battery disconnect", "smoke test done at 0.5 psi, no leak". If it is not written down here, Claude, the gate, and the fault tree cannot see it -- it stays invisible context that only lives in one person's head.

How to add a note in cuore

In cuore: open **/v/<VIN>/notes** for the full list and add-note form, or use the "Add a note" panel embedded on the vehicle page, a code page, or a fault-tree step page (the target is pre-filled and locked there so a note cannot be mis-filed). Pick a **target**, write the note (up to 4,000 characters), and submit. Notes are append-only: **Edit** adds a new version and keeps the old text as history; **Hide** soft-deletes (never actually erased). Default author is "technician" unless you set one.

Target kinds

Target kind	Matches against
`vehicle`	The car as a whole
`code`	One DTC, matched on its base code (a note on P0456 also attaches to P0456-00)
`log`	One MES log file, by name
`observation`	One live-link observation, by its timestamp
`dealer`	One dealer (wiTECH) result, by its timestamp
`tree_step`	One fault-tree step, e.g. evap-leak:E7
`component`	A free-text part name, e.g. ESIM
